DUAL PRODUCTS FLAT FOIL(CPP)CONVERTING LINE
FOR #SHEETS PROTECTOR AND " L " SHAPE

電腦式全自動檔案夾資料袋雙線製造機

Introduction of machine

The MGA40A-700-2S, was designed for top quality products in mind, it work with flat foil instead of blowing films.
The flat foil are passed through the printing station if required, the following stage that place.

Sheets protector

- #5) The center due mould punching die,punches the 11 binding holes
- #6) TheUltrasonic weld the bottom of the products
- #7) The cut off station
- #8) Auto counter receiving tray A & B

"L" Shape

- # 1)and2)as above # hot stamping
- # Thimp Notch punching # Cut off station
- # Ultrasonic welding of bottom
- # Auto counter collect tray A & B

- This dual products production was developed due to increasing demand of better quality products made from Cast PP foils from 0.03mm and above sheet protectors and "L" shape folder of 0.06mm and above.
- This system also includes a optional flexo printing station this allow the printing of the folding edge for production of printed edge sheets protectors and "L" shape folders.unlike other system that used heat sealing for welding of the bottom,this system welding with a 2.6kw ultrasonic.
