模內貼標生產系統 In Mold Labeling Turnkey Solution

模內貼標係一種高效率的生產技術，藉由將印製精美的標籤事先置放在模具中，並在射出時，將塑膠原料與標籤一體成型，簡化傳統複雜的二次加工製程，不僅生產效率高，產品品質佳，並能有效降低生產成本，協助做好環境保護。

In Mold Labeling (IML) is a highly efficient technique. Performed by placing the printed label in the mold before injection and bonding the label with the plastic products during the injection process. IML can produce high quality products efficiently, cost effectively and environmentally friendly.

生產流程 Production Process

1 開模時置入標籤紙
Inserting label when mold opens

2 關模並射出
Mold closes and finishes injection

3 成型品取出
Taking out the finished product
