

Dry Laminating Machine

WEIJIN MACHINERY INDUSTRY CO., LTD.

WJ-LII Dry Laminating Machine

Dry Laminating Machine

• Outstanding Features

Machine Mechanism

1. Advanced automatic splicing & feeding mechanism - Allow for high speed & ultra fast laminating job changes without stopping the machine.
2. Pneumatic control impression roller - Easy to operate both up & down.
3. Double layer drying system with high load capacities and adjustable temperature controls make efficient drying possible.

Electro Control Design

1. Main & sub transmission system are fully micro-computerized PLC programmed & controlled.
2. Man/Machine interface controller with simple, easy to use operator controls.
3. Advanced drive system provides superior web tension control, requires less maintenance, and reduces waste.

WJ-LIII Dry Laminating Machine

• Applications

Our dry laminating machine is applicable to laminate PET, CPP, OPP, PP, PE, Nylon, Aluminum Foil, Paper.... etc

• Technical Parameters

Web width range	800 to 1600 mm
-----------------	----------------

Machine speed	160 - 250 m/min
---------------	-----------------

Laminating speed	150 – 200 m/min
------------------	-----------------

Unwinding and Rewinding diameter	φ600 mm φ800 mm
----------------------------------	-----------------

Design & Production are available for special specifications.
