

## ■ WMD

## Double Needle Bar Raschel Machines for Manufacturing Packing Sacks

### Applications

- Onion bags (So called "ready-made sacks" for packing orange, lemon, potato.....etc.)
- for special wide nets
- for double layered nets

Yarn let-off system method described below:

- Yarn feeding from slitting extension machine (ISO system)
- Yarn feeding from creel stand
- Yarn feeding from warp beams
- Taking of warp knitted sacks. The continuous netting is batched into rolls of 1000 mm dia. or online automatic cutting machine

### Specifications

|                    |                                                              |
|--------------------|--------------------------------------------------------------|
| MODLE              | WMD                                                          |
| Applicable Yarn    | HDPE flat yarn, Monofilaments,                               |
| Working Width      | 170"-210"                                                    |
| Machine Gauges     | packing sacks: 2-6 needles / per inch                        |
| Warp Supply System | from : warpping beams / creel stand / slitting extension M/C |
| Performance        | 500 - 600 RPM                                                |
| Number of bars     | 9-11 Ground bars                                             |
| Main Motor         | 7.5 kW                                                       |
| Machine Weight     | 8500 kgs                                                     |
