

Total Solution for In Mold Decoration Technology

Environment-friendly plastic decoration process -IMD/FIM/IML(In-Mold Decoration/ Film Insert Molding/In-Mold Labeling)

Product : Housing/casing of Mobile Phone, MP3/MP4, GPS, Lab-Top Computer, 3D Labeling of Electric Goods; Automotive Dashboard Meters, Controllers, and Interior Decorative Items; the fancy colored Plastic Body Parts of Motorbike;.....etc.

Machine performance

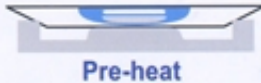

Green Design , Machine Life over 20 years

- Energy saving at least 50% compared to others in the same spec
- Reduce the heat caused by the machine and cooling water consumption
- High speed and precise control reduce the defection
- Protect the environment and cost down by green-designed machine

- High speed and low pressure especially designed for IMF, IML product
- No jetting, protect the paint , flat surface, less defection
- Vertical clamping and injection, lower mold slide out, easy to fix the film in the mold and safely insert and take out.

Screen Printing

Pre-heat

High Pressure Forming

Cutting / Trimming

Injection Molding

Finished IMD Product
