Extruder & Pellet Cooling System

Material Auto Weighting System

Dust Collector (Automatic Air Jet Cleaning)

Dust Collector is used for air conveying or powder unloading system for dust collecting.

Feature:

1. Easy to maintain and clean filter without tools.
2. Automatic air jet vibration drops dust.

Collection Efficiency:

1. Particle Size 1 ~ 2 μm : 85.7 %.
2. Particle Size 2 ~ 5 μm : 98.9 %.
3. Particle Size 5 ~ μm : 100 %.

Powder Auto Weighting System

Powder Weighing Unit is designed to transport various powder materials into the weighing tank according the pre-set value (recipe).

The powders are transported by screw conveyor automatically. Every measured powder will store in the tank and wait for next discharge step.

Feature:

1. Automatic high efficient weighting and conveying.
2. High accurate weighting.

Liquid Auto Weighting System

Liquid Weighing Unit is designed to transport various liquid materials into the weighing tank according the pre-set value (recipe).

The liquid are transported by conveying pump automatically. Every batch of measured liquid will store in the tank and wait for next discharge step.

Feature:

1. Automatic high efficient weighting and conveying.
2. High accurate weighting.
